Our Mission

We help our partners by providing them with the latest technology, products, services and expertise at the lowest cost.

Our Vision

we are looking to be IT partner for Small and Miduim sized Business in Egypt and Middle East.

Our Message

We work to provide integrated and reliable technological solutions that meet our clients' needs and exceed their expectations, while adhering to the highest standards of quality and efficiency.

VISION

MISSION

VALUES

Our Service

Network & Security

Network infrastructure products optimize real-time applications, ensuring low latency, flexibility and a high-quality user experience.

Data & Phone Network Infrastructure

Network and communications infrastructure forms the foundation of corporate communication, supports modern systems, and addresses the challenges of security, interoperability, and scalability.

Switching & Routing

We offer comprehensive routing & switching services, including design, installation, configuration, OSPF/BGP protocols, fiber connectivity, and routers.

Data Security Management

Performance Networks provides managed network services including monitoring, security, support, network design, VPN, and SD-WAN to ensure efficiency and performance.

Our Service

Hardware & Systems

Software and hardware work together to improve performance, enhance functionality, and enhance the user experience.

Hardware Delivery

Hardware delivery services provide technical and construction equipment quickly and efficiently, supporting projects and saving time, while eliminating the challenges of packaging and safe delivery.

Microsoft Servers Apps for Systems and Applications

Microsoft offers powerful server applications for data management and infrastructure, supporting security, integration, digital transformation, and flexible cloud solutions.

Systems Management

Systems management ensures the stability, performance, and security of the infrastructure, including monitoring, updates, assets, and protection, using intelligent and integrated tools.

Our Service

Smart Home & Office

Home/office automation systems control lighting, climate, security, and appliances and are an important part of the Internet of Things (IoT).

Smart Home & Office solution

Smart solutions for homes and offices enhance comfort, security, and efficiency through automated device control and integration with artificial intelligence and the Internet of Things.

Power Management & Energy Saving

Energy management enhances efficiency and reduces costs and emissions through smart systems, energy-efficient appliances, and accurate analytics, supporting sustainability and environmental responsibility.

Monitor and control home & office attributes

Smart monitoring and control systems enhance safety, comfort, and energy savings through smart devices and integration with artificial intelligence and the Internet of Things.

Data Security Management

Performance Networks provides managed network services including monitoring, security, support, network design, VPN, and SD-WAN to ensure efficiency and performance.

Our Service

IP Surveillance | Systems

IP video surveillance systems offer high quality and scalability that outperform traditional analog systems. They support PoE and WiFi cameras, reducing network costs and facilitating installation in challenging locations. The solutions target commercial, medical, financial, and office organizations, offering advantages in monitoring and employee control. They enhance security, detect violations, and help identify incidents and violations accurately and efficiently.

Our Service

IT Consulting & Training

IT Flag provides professional expertise and consulting to ensure IT continuity, minimize downtime, and understand customer needs.

IT Consulting service

Technical consulting services help plan networks strategically and operationally, improve efficiency, and direct technology investments toward business goals.

IT Team Selection

Building a successful team requires a balance of skills and experience, with clearly defined roles to ensure efficiency and achieve project or business goals.

IT Team Training

IT team training enhances technical and leadership skills, reduces the talent gap, increases productivity, raises employee loyalty and achieves business goals.

IT out source help desk

The T Out Source Help Desk service provides professional outsourced technical support, reduces costs, and allows companies to focus on their core business efficiently.
